Abstracts presentation
14:00-15:30
> MANZONI MEETING ROOM

Paolo Muiesan
Marti Manyalich

OUTCOMES AND FUTURE PERSPECTIVES

Poster session
12:30-13:30

Marcelo Cypel
The role of EVLP in DCD lung transplantation
Luigi Santambrogio
Thomas Minor

OPTIMIZING UTILIZATION AND PRESERVATION STRATEGIES
UPDATES OF DCD LUNG AND HEART TRANSPLANTATION
17:00-18:10

cDCD liver transplantation: 8:30-9:00

Production of physiologically relevant quantities of the most atractive proteins during normothermic outcome than biopsy score: preliminary experience in 35 consecutive kidney transplantations

early renal graft function compared to continuous or end ischemic O2 supply:

9:55-10:30

Abstract session 4: DCD AND MACHINE PERFUSION

Min Yang
Red blood cell distribution width as a predictor for mortality in renal transplant recipients

Controlled donation after circulatory death using normothermic regional perfusion

Cardiac Death (DCD) livers
Of donation after circulatory death and donation after brain death donor livers

Increasing Donor Lungs Utilization from DCD and Extended Criteria Donors

Using OCS Lung System for Optimization and Assessment - Results of the OCS Lung Single Centre Experience

Hypothermic vs normothermic machine perfusion in DCD

Shanice Karangwa
Novel technique for echocardiographic evaluation of ventricular function during ex vivo heart perfusion

Is abdominal normothermic regional perfusion compatible with concurrent direct procurement?

Andrea Schlegel
Donor with mechanical cardio-pulmonary resuscitation (mCPR) followed by ECMO

Uncontrolled DCD: when and where should it be considered?

Eric Savier
Uncontrolled DCD: when and where should it be considered?

Ante mortem measures, no-touch period and posthumous harm during organ procurement:

John O'Grady
Actual ethical issues for use of ECMO in organ donation (OD)

Uncontrolled DCD: when and where should it be considered?

Francesca Tinti
Hypoxia and apoptosis: role in development of ischaemic cholangiopathy in DCD liver transplantation

Biliary complications: are we closer to a solution?

A matched case-control study of the behaviour of type 2 and type 3 Donation after Circulatory Death (DCD): Recipients of DCD liver grafts treated with NRP display lower postoperative morbidity and mortality

Federico Oppenheimer Salinas
DCD kidney transplants with 20-min no-touch: the "Alba" protocol

Comparison of renal transplantation outcomes from donation after cardiac death donors

Espen Nordheim
Jose Maria Navalpotro Pascual

Echocardiographic evaluation of systolic ventricular function in a porcine model of DCD

The problem

Cochrane Review: will DCD be a future donor source?

The problem

Morten Hagness
Oleg Reznik

Actual ethical issues for use of ECMO in organ donation (OD)

Daniel H. Heaton
Donors after cardiopulmonary resuscitation

Actual ethical issues for use of ECMO in organ donation (OD)

John Isaac

Abstract session 1: THE DCD DONOR

Emanuela Paradiso
Red blood cell distribution width as a predictor for mortality in renal transplant recipients

Controlled donation after circulatory death using normothermic regional perfusion

Cardiac Death (DCD) livers
Of donation after circulatory death and donation after brain death donor livers

Increasing Donor Lungs Utilization from DCD and Extended Criteria Donors

Using OCS Lung System for Optimization and Assessment - Results of the OCS Lung Single Centre Experience

Hypothermic vs normothermic machine perfusion in DCD

Shanice Karangwa
Novel technique for echocardiographic evaluation of ventricular function during ex vivo heart perfusion

Is abdominal normothermic regional perfusion compatible with concurrent direct procurement?
